Eng. Josué A. Colón Ortiz
Executive Director
Puerto Rico Public-Private Partnerships Authority (P3A)

Mr. Osvaldo Carlo Linares
Regulatory Compliance Services, Corp.
Third-Party Procurement Office
American Airlines Building
1509 López Landrón PH
San Juan, PR 00911

Dear Engineer Colón Ortiz and Mr. Carlo Linares:

Re: Emergency Temporary Power Generation – Formal Request Pursuant to Energy Bureau Resolution and Order Case No. NEPR-MI-2024-0005

On August 31, 2026, the Puerto Rico Energy Bureau (Energy Bureau) issued a Resolution and Order in Case No. NEPR-MI-2024-0005 concerning the status of the competitive process for the acquisition of emergency temporary generation following the termination of the Power Expectations contract. In its directive, the Energy Bureau instructed the Puerto Rico Electric Power Authority (PREPA) to formally request, within three (3) business days, that the Puerto Rico Public-Private Partnerships Authority (P3A) and the Third-Party Procurement Office (3PPO) submit a report containing updated information regarding the status of the competitive process and the alternatives available under the terms and conditions of the existing procurement process.

Accordingly, and in compliance with the Energy Bureau's August 31, 2026 Resolution and Order, PREPA hereby formally requests that the P3A and the 3PPO provide a written report addressing, at a minimum, the following matters:

1. The current status of the competitive process and of the proposals received, including identification of which proposals, if any, remain valid, active, or otherwise under consideration. This should include the present status of the proposals submitted by Javelin Global Commodities US Holdings and Gotham Energy, LLC.

2. Whether the terms and conditions of the existing competitive process permit, as a consequence of the termination of the Power Expectations contract, the continued

evaluation, negotiation, or award of any proposal previously submitted, without the need to initiate a new competitive procurement process.

3. If the existing competitive process may continue, the alternatives available under its terms and conditions, the specific provisions that authorize or permit those alternatives, the steps and approvals that would be required, and the estimated time necessary to complete those actions.

4. If the existing competitive process may not continue, the legal, contractual, procurement, or procedural reasons prevent continuation and whether a new competitive procurement process would be required.

5. The independent recommendation of each of P3A and the 3PPO, stated separately, regarding the most expeditious course of action to continue the acquisition of emergency temporary generation.

Likewise provide any documents, procurement records, or other materials that support the report and the recommendations submitted. Given the urgency of this matter, and PREPA's obligation to file with the Energy Bureau—within two (2) business days of receipt—the request, the response, and all supporting documents and attachments, PREPA respectfully requests that the foregoing information be submitted no later than September 4, 2026.

Your prompt attention to this request and your cooperation are greatly appreciated.

Cordially,

Mary C. Zapata Acosta
Executive Director
