Subject: Declaration of Sole Source Interest in RFP 3PPO-0314-20-TPG2
To: Third-Party Procurement Office (3PPO)
Puerto Rico Public-Private Partnerships Authority
San Juan, Puerto Rico

Date: July 23, 2025

Dear Procurement Officer,

On behalf of **Creeksource Consulting, LLC**, a tribally affiliated small business wholly eligible under the U.S. Small Business Administration (SBA) 8(a) Business Development Program, I am writing to formally express our interest in pursuing a **sole source award** for the Emergency Temporary Power Generation contract (**RFP 3PPO-0314-20-TPG2**), as amended by Addendum #4 dated July 22, 2025.

As a Native American-owned business affiliated with the **Muscogee (Creek) Nation**, Creeksource is eligible under the following federal sole-source authorities:

- **Federal Acquisition Regulation (FAR) 6.302-5(b)(4)** — which authorizes sole source awards to 8(a) participants owned by Indian Tribes or Alaska Native Corporations, without a justification up to $100 million;
- **13 C.F.R. § 124.506(b)** — which permits sole source 8(a) awards to tribal-owned entities above the standard competitive threshold without justification;
- **FAR 19.805-1** and **FAR 19.808-1** — which guide the award process for 8(a) entities and SBA involvement.

In accordance with these regulations and as affirmed by SBA guidance, Creeksource requests formal consideration as the sole source awardee under this RFP.

Creeksource Capabilities:
Creeksource Consulting has the technical and logistical capacity to fulfill the objectives of this emergency RFP. Our capabilities include:

- Procurement and deployment of Tier 4 Final compliant mobile generators;
- Turnkey installation services including transportation, fueling, and on-site support;

- Integration with local infrastructure and power stabilization systems;
- Compliance with **PREPA**, **FEMA**, and **NERC** operational standards;
- Availability of local teams and bilingual technical staff for coordination and delivery.

In addition, Creeksource has established a joint venture partnership with **Energy Services Consulting (ESC)** to support engineering and operational requirements for distributed energy and microgrid projects. This alliance ensures immediate access to design-build resources, modular generation solutions, and long-term resilience planning in emergency contexts.

We are fully prepared to submit required documentation, including our SBA 8(a) certification, technical capabilities, and confidentiality forms by the **July 24, 2025** deadline, and intend to meet the subsequent milestone of submitting a formal proposal by **August 6, 2025**.

Please see the attached summary of completed projects for additional reference.

Sincerely,

Samuel Banks
